

Linguistic Drift Analysis Report

Target Corpus: Political Speeches (2000-2024)

1. Executive Summary

Overall Meaning Drift Score: 74/100

Analysis of 847 segments reveals a statistically significant shift in pragmatic force. Specifically, the frequency of Directive speech acts has increased by 13.4% in Period B compared to Period A.

2. Pragmatic Evidence (Qualitative)

Based on Searle (1969) and Grice (1975), the following segments demonstrate the drift from Assertion to Mobilization:

Segment #203: "We must act now to ensure our future."

Anal

Segment #445: "The community is our strength."

Anal

3. Theoretical Synthesis

The statistical increase in Maxim of Quantity violations correlates with the rise in ambiguous politeness strategies, suggesting a strategic shift in discourse to avoid accountability.
